

# CHASE OSTIEN

## Entry-Level Software Engineer

+1-956-407-5093

chaseostien@gmail.com

<https://main--glistening-profilerole-ef9ae7.netlify.app/>

Austin, TX

## EXPERIENCE

2021 - Present

Austin, TX

### Facilities Lead

#### Self Financial, Inc

Self Financial, Inc is a FinTech company that builds products to help sub-prime borrowers build credit.

- Oversee all in person operations in our Austin office and sub leased space
- Managed cross-functional projects such as office moves, real estate transactions, renovations and policy implementations
- Train and oversee building security, front desk staff and office team
- Implement and track budgets for all in person operations including maintenance, equipment, food, supplies and security

## EDUCATION

2015 - 2020

### BS Biology, Biochemistry

#### Texas State University

- Coursework in genetics, molecular biology, organic chemistry and physics
- Made Deans list in 5 of 10 semesters while working full time

2023 - 2023

### Certification, Full Stack Web Development

#### The University of Texas at Austin

- Intensive 6 month coding bootcamp covering a wide range of front end and back end technologies
- Completed 20 weekly projects and 3 full stack group projects
- Gained valuable project management experience by completing projects in a group setting. Managed project code with GitHub, Git, GitLab

## PROJECTS

### Sabor Mexicano

2023 - 11/2023

<https://sabor-mexicano-aded3d6892cd.herokuapp.com/>

Bootcamp Graduation Project

- Full stack application built using MERN stack technologies. This concept website allows a user to order food from their favorite food truck or restaurant. Utilizing a back end built with Node.js, Express and MongoDB/Mongoose, an Apollo GraphQL Query layer and a React front end gives the user flexibility to view meals based on categories, add items to cart, sign in and check out.

### Venue Viewer

09/2023 - 10/2023

<https://venue-viewer-team1-69164e361419.herokuapp.com/login>

Full stack web application for searching venues using the Ticketmaster API. Displays information on specific venues and allows users to post comments to review the venue.

- This application consists of a Node.js and Express.JS backend, a MySQL database and Tailwind CSS for styling.

### OpenAI Blog Writer

2024 - Present

<https://github.com/ChaseOstien/OpenAI-Blog-Writer>

AI text generator using the OpenAI API and GPT-3.5-turbo-1106 model. This application will allow the user to write engaging and well-structured blog posts based on prompts passed to the OpenAI model. This model can be trained on your existing written content to fine tune it's writing style.

- I have completed the back end functionality of this application. The UI is currently under development and will consist of React and Tailwind CSS
- This application will allow companies to fine tune AI models on their existing written content and speed up the drafting process for future written content

## SKILLS

### Coding

MySQL/Sequelize

MongoDB/Mongoose

Javascript

Python

Flask

Jinja2

Node.js

Express.js

RESTful API

SQLAlchemy

Tailwind CSS

React

TypeScript

### Project management

Trello

Jira

Git

Asana

GitHub
